Use this link for a bilingual person who has expressed interest in having a dream job as an interpreter, with us.

All interpreters that work for myfriendsinspain automatically join the Referral Program so that they get commission, on top of earnings, for any clients that they bring onboard with them, or generate whilst working with us - these are people that could earn you quite a bit if they are in your network.

Make sure to explain that to them too.

If we are not taking on new interpreters at the moment they apply, they can still earn by applying, then joining the Referral Program - and that is the best way to get noticed by us! If they do that, they'll be high on the list as soon as we need to call on more interpreters. And this could be directly thanks you yours and their efforts, so all the more reason for them to jump in quick! A real win-win!
